The conference, which will take place on May 25 and 26, focused on Nursing and Healthcare, and Dr. Agrawal spoke on the topic of 'Methylcobalamin and its utility'. Dr. Agrawal, who holds 40 formulation patents and has invented 17 unique formulations in the lab, has dedicated his career to research in the medical field. His expertise on Methylcobalamin, also known as Vitamin B-12, will provide valuable insights to attendees of the conference.

"Methylcobalamin is found in abundance in non-veg foods and milk, hence its deficiency is seen in vegetarian people," said Dr. Agrawal. "In addition, the use of certain medications such as antibiotics and antihypertensives can reduce the body's ability to accept it. Currently, its deficiency is seen in 90 percent of people."

The Editors of Nursing International Journal of Medical Research Health Sciences had recognized Dr. Agrawal's contributions to the field and had invited him to speak at the prestigious international conference in London. His presentation shed light on the utility of Methylcobalamin and its potential impact on healthcare.

This was a significant opportunity for the medical community to learn from one of the foremost researchers in the field. Dr. Agrawal's talk was a highlight of the conference, and attendees were encouraged to attend and benefit from his expert knowledge.
