In a significant step towards boosting research and development in pharma, nutraceuticals and health products, Alkomex Pharma Intl, a global player based in Chile, has formalized a cooperation agreement with Dr Sanjay Agrawal, a distinguished Indian expert and faculty member of the Global Institute of Health Management in Delhi. The partnership was formalized in Jaipur, Rajasthan, after a series of meetings.

Dr Agrawal, widely recognized for his contributions to health management and nutraceutical products, has been appointed as the Scientific Advisor for Alkomex Pharma. As part of the agreement, Dr. Agrawal will be based in Ahmedabad, spearheading research and strategic development for the company's worldwide projects.

The letter of intent was signed by Alex Meneses Vega, CEO of Alkomex Pharma, a company that was founded in Chile in 2007 and is headquartered in Rockland, New York, USA. The collaboration aims to integrate innovative

research from India into Alkomex's global operations, furthering the development of cutting-edge health products.

Vega praised Dr. Agrawal's expertise, emphasizing that his experience and thought leadership in nutraceuticals will be a driving force for Alkomex's growth in the sector. The collaboration is expected to bolster research and product development, focusing on enhancing health through scientifically-backed nutraceuticals and functional foods.

Dr. Agrawal expressed his enthusiasm about joining Alkomex Pharma, highlighting the potential to advance global health solutions with a blend of Indian and international research.

This cooperation marks an important milestone for both Alkomex Pharma and the Indian nutraceutical industry, as global interest in functional foods and supplements continues to grow.

This partnership is expected to open new horizons for innovations in health-related products, with both parties optimistic about future developments.
